

# SEMINARS IN DEVELOPMENTAL AND REPRODUCTIVE BIOLOGY (DRB 613)

## COURSE INFORMATION

- Course Coordinator:** Dr. Monika Ward  
Institute for Biogenesis (IBR) Room E-104  
Tel: 956-0779; Fax: 956-7316; [mward@hawaii.edu](mailto:mward@hawaii.edu)
- Day and Time:** Wednesdays, 1PM – 2PM
- Location:** IBR Conference Room  
Manoa Campus  
1960 East-West Rd, Honolulu
- Credits:** 1 credit per semester
- Course Objective:** Weekly seminars provided by Graduate Faculty of the Graduate Program in Developmental and Reproductive Biology as a mechanism to inform DRB Graduate Students about research conducted within the program and potential projects in which they could become involved.
- The course may also include 'special' seminars (up to two per semester), which are not listed on the schedule. These additional seminars will be given by graduating students and/or special guests and date/time will be provided later. Because these seminars are part of the course, they fall under the general grading system.
- Grading:**
- The grading is based on attendance and 100% attendance\* is required for passing the course.
- \* Exceptions from 100% attendance will be granted by the course coordinator ONLY when legitimate reasons for absence are provided, and the request is made IN ADVANCE. Absence from more than 2 seminars per semester, even with legitimate reasons, precludes the student from obtaining credit.
- Other information:**
- The format, in which the faculty will present their seminar is determined by them. They may present their own research data or their overall scientific interests. They can focus on one aspects of their research or talk broadly about many projects. The faculty giving seminars are not required to provide any handouts or any other material relevant to their research. The students who are interested in presented research topic can approach the individual faculty for information and discussion. It is entirely at the faculty discretion to choose if they want or do not want to meet with the students.
- Course coordinator will be happy to answer any queries and help with any matters relating to this course. The best medium to contact the instructor is e-mail.

## FALL 2017 DRB 613 SCHEDULE\*

<b>Date</b>	<b>Speaker</b>	<b>Speaker Primary Affiliation</b>
August 23	Yusuke Marikawa	Institute for Biogenesis Research (IBR)
August 30	Vernadeth Alarcon	Institute for Biogenesis Research (IBR)
September 6	Thomas Huang	OB-GYN and Pacific IVF
September 13	Johann Urschitz	Institute for Biogenesis Research (IBR)
September 20	Olivier LeSaux	Cell and Molecular Biology
September 27	Rich Allsopp	Institute for Biogenesis Research (IBR)
October 4	Masato Yoshizawa	Biology
October 11	Steve Ward	Institute for Biogenesis Research (IBR)
October 18	Yukiko Yamazaki	Institute for Biogenesis Research (IBR)
October 25	Ben Fogelgren	Anatomy, Biochemistry & Physiology
November 1	Stefan Moisyadi	Institute for Biogenesis Research (IBR)
November 8	Monika Ward	Institute for Biogenesis Research (IBR)
November 15	Michelle Tallquist	Cell and Molecular Biology
November 22	Lana Garmire	Cancer Center
November 29	Jesse Owens	Institute for Biogenesis Research (IBR)
December 6	Alika Maunakea	Native Hawaiian Health

\* Last minute changes can occur.
