Medical History

ID: 
RE: 
S/R: 
CC: 

PI: Location, quality, quantity, chronology, setting, aggravating, alleviating factors, associated manifestations

PH: Childhood illness / Adult illness:
Hospitalizations, injuries:
Allergies:
Transfusions:
Current medications:

FH:

PP: Past development—Current life situation

Allergies

- Glaucoma
- Anemia
- Hypertension
- Heart disease
- Diabetes
- Kidney disease
- Arthritis
- Bleeding tendencies

Blood pressure

- Arterial blood pressure
- Venous blood pressure

Coagulation parameters

- Prothrombin time
- Partial thromboplastin time
- D-dimer level

Chest pain

System Review:

General: Weight change, fever, night sweats, fatigue, weakness

Skin: Color change, rash, itching, bruising, hair

- nail changes, cancer

Eyes: Blurring, decreased, double vision, scotoma,
- eye pain, redness, glasses

Ears: Decreased hearing, tinnitus, pain, discharge, vertigo, dizziness

Nose: Rhinitis, rhinnenorrhea, discharge, obstruction, sneezing, pain, epistaxis, sinusitis, colds

Mouth: Gingivitis, sore tongue, taste changes, dental problems

Throat: Pain, voice changes

Pulmonary: Chest pain, pneumonia, SOB, DOE, wheezing, cough, sputum, hemoptysis, TBC

Circulatory System:

- Chest pain
- Palpitations
- Dypsnea
- PND
- Orthopnea
- Edema
- Hypertension

Heart: murmurs, palpitations, arrhythmias

GI: Appetite, dysphagia, indigestion, gas, heartburn, nausea, vomiting, abdominal pain, rectal pain, hematemesis, melena, abn stools, constipation, cathartics, diarrhea, jaundice, hemorrhoids, hernia, peptic ulcer disease, gallbladder disease, pancreatitis, hematochezia

GU: Frequency, nocturia, polyuria, urgency, dysuria pyuria, hematuria, hesitancy, urinary flow changes, retention, incontinence, history of 'kidney trouble', abnormal urinalysis, urinary tract infection

Male Genitalia: Genital sores or lesions, prostate trouble, scrotal mass, scrotal pain or tenderness, hemospermia

Birth Control: Birth control methods

Female Genitalia: Pelvic pain, vaginal discharge, abn, vag, bleeding, menarche: age-year/ menopause, age-year, menstrual flow, interval-days, durations-days, amount, date last menstrual period, postcoital bleed, postmenopausal bleeding, gravid, miscarriages, stillbirths, para, caesarean, abortion, pelvic mass

Breast: Breast lump, pain, nipple discharge, Galactorrhea

Sexual History: Sexual difficulties, syphilis, positive serology, gonorrhea, AIDS

Endocrine System: Neck mass, thyroid problems, exophthalmos, heat/cold intolerance, thirst changes, glycosuria, excessive sweating

Mood: Anxiety, depression, interpersonal relationship difficulties, lonely, work or family problems, nervous habits, substance abuse
Patient Profile Outline

Past Development

Birthdate:
Birthplace:

Family: Father (occupation)
Mother (occupation)
Siblings (number, sex, rank order of patient)
Quality of family life:
Special problems, events

Childhood: Location—Quality—Significant events

Adolescence: Significant events
location (if different)

Educational history: Completed high school?
Where?

Past employment history:

Marital history:
Number
Age
Children—no. and sex, birthdate

Travel and/or other significant life events:

Current Life Situation

Living condition:

Home and family - Location
Significant persons in life
(If different from family)
Quality of life style

Marital Hx (if not previously discussed)

Present occupation:

Diet (typical day):

Activities (typical day):
Exercise (type and amount)
Hours of sleep

Leisure activities:

Use of ETOH (previous, esp. if excessive and now):

Use of tobacco (previous)
(now-total pk/day yrs):

Use of Prescription and/or Non-prescription drugs (substances):

Financial status:

Religious Affiliation:

Insurance:

Reaction to Illness:
